Education

- 2010 – 2017  **Lycée de Nkoteng.**
Baccalaureate C in Mathematics and Physics Sciences
- 2020 –  **National Advanced School of Engineering, Yaoundé (NASEY).**
5th year engineering student in *Digital Arts and AI, Software Engineering, AR, VR.*
Center of interest :
Machine Learning, Deep Learning, Big Data, Web Programming, Mobile Development,
Software Engineering, AR/VR, Computer Vision, Digital Marketing, Numerical Economy.

Skills

- Languages**  Strong reading, writing and speaking competencies in **French, English(B1)** and i'm self-taught learner of **Mandarin Chinese** language.
- Coding**  Python, JavaScript/TypeScript, Dart, Java, C/C++, PHP, SQL, XML.
- Databases**  MySQL, MongoDB, SQLite, FireBase.
- Frameworks/Libraries**  ReactJS/AngularJS, Flutter, Tensorflow, Flask Keras, Pandas, Numpy, ...
- Tools**  Git/GitLab, VS Code, Jupyter, Anaconda, ...
- Misc.**  E-retailer, Training, Communication, Design, Entrepreneurship.

Professional Experience

- June 2020 – July 2021  **Junior web developer intern at The Baoba AG**, my mission was to build React UI components for the API of The Baoba AG.
- June 2024 – Sep. 2024  **Pre-engineer AI developer at Smart DS**, working in computer vision to develop a multi-object multi-camera system for real-time surveillance.
- Feb 2025 – ...  **Web developper at TresorPay**, working as a Web Developer at TresorPay, a digital platform for securing and digitizing non-tax revenues in Cameroon.

Projects and Publications

Projects

- 1 **Blind assistance with audio feedback** | YOLOv, Streamlit, OpenCV, TensorFlow
—Image tracking.
—TextToSpeech.
—Distance calculation.
.
- 2 **Building of Mobile Medical Data Extraction System** | Figma, Flutter, Dart
—Designed the structured output schema (form) to ensure accurate and reliable extraction of medical data for decision support.

—Built and integrated mobile app features to capture and transmit visual data inputs to the extraction system.

3 **Intelligent NLQ System for Medical Databases and Decision-Oriented Visualizations** | NLQ, LLM, NextJS, MySQL

—Designed an intelligent natural language query (NLQ) interface to query medical databases using plain language.

—Fine-tuned CodeT5 on domain-specific Text-to-SQL data to improve the accuracy and reliability of generated SQL queries.

—Engineered decision-oriented visualizations (interactive charts, dashboards) for presenting query results in a format optimized for clinical decision-making.

4 **Recommendation system using Deep learning** | Deep Learning, MongoDB, ReactJS, VGG16, PyTorch

—Developed a Flask API to communicate the model and the frontend.

—Used of NoSQL Data base for data storage.

Miscellaneous Experience

Awards and Achievements

2021  **Excellence Award**, laureate of the 2021 edition of the ZTF Excellence Award.

Certification

2024  **Certified in Responsive design in freeCodeCamp**, awarded by freeCodeCamp.

 **Certified in Design Thinking**, awarded by Lufthansa Group.

2025  **TOEFL iTP**, with B1 level.

Social life and Leadership

2024  **AHN Club** | AI cell manager.

AHN for Digital Arts and Humanities is an NASEY club that promotes the acquisition of skills related to the school's Digital Arts and Humanities specialties and makes the sectors visible within the school.

— Manage activities of AI cell of the club.

— Plan the work of the cell for the year, organize MasterClass in the field of AI.

 **Excellence and reading club in NASEY** | Coordinator of the club.

Involved in the club focused on promoting excellence in all its ramifications and reading books.

— Manage activities of the club, plan the work of the club for the year.

— Organize educational outings, talks and studies on various subjects (economics, agriculture, etc.).

Hobbies

 **Reading books**

 **Football**
